

SMM RESELLER PANEL SCRIPT

UPLOADING FILES

Hello. This is the first step of installing the Enigma – SMM Reseller Script.

Solution 1: FTP, Requirements: FTP Server installed.

1. Extract the archive.
2. Configure your MySQL connection at: /files/configuration.php
3. Upload the files to your server.

Solution 2: FileManager, Requirements: cPanel Access.

1. Extract the archive.
2. Configure your MySQL connection at: /files/configuration.php
3. Open the folder of the archive and archive all files again but in ZIP archive.
4. Open your FileManager and click "Upload Files".
5. Select the .zip archive and upload it.
6. Refresh your file list.
7. Right click over the .zip archive and click "Extract".

INSTALLING THE PANEL

After uploading the files you have to follow the instructions below to complete with the installation.

1. Open new tab on your browser and go to your website where you are installing the script..
2. Open ./installer.php at your URL bar (Example: <http://127.0.0.1/installer.php>).
3. All tables will be created at your MySQL host for your ease.
4. After the table creation multiple inputs will display.
5. Create your admin account.

The file "installer.php" will be automatically deleted for your secure.

CREATE YOUR FIRST CATEGORY

1. Sign in to your panel with admin details.
2. Go to the navigation bar "Administration" - "Administration [1 Page]".
3. Click at "Categories".
4. Click at "New Category" button and fill all fields. Category description is shown only to website administrators like you.

CREATE YOUR FIRST SERVICE

1. Sign in to your panel with admin details.

2. Go to the navigation bar "Administration" – "Administration [2 Page]".
3. Click at "Services".
4. Click at "New Service" button and fill all fields.

Skip step 5 if you don't have API

5. To assign your API url to some service the API url should look like this,
`http://example.com/api.php?key=YOUR_KEY&quantity=[QUANTITY]&link=[LINK]`

If there are some additional GET parameters add them at the same way. Do not replace [QUANTITY] and [LINK] with anything else, just add them in this way. They will be replaced when the order is submitted.

6. If you are using API your order will be processed automatically as "Completed" if you are not using the order will be processed as "In Progress" and you have to change the order status manually from the "Orders" tab.
